Chrome plated Zink, satin chrome plated Zink on request.

**390 785**

Zink plated steel.
With pivoting arm.

**390 684**

Zink plated steel.

Performance

Assa locker hasps 391 350, 390 785 and 390 684 for material thickness up to 16 mm. Large selection of 3mm thick catches

Function

In locked position the padlock stops the catch from turning. When the padlock is removed the catch can be turned 90° and the locker can be opened. Right hand turning as standard and left hand is available on request. For the best function Assa recommend padlocks with shackle thickness between 5 and 7 mm and minimum shackle opening of 19 mm.

Accessories

Turn 391 039 can be delivered together with locker hasp with pivoting arm (390 785). The composite turn protects the pivoting arm and creates a more user friendly turn.
