### ***Communicating Bathroom Systems Controls***

For a common single bathroom shared by two patient rooms or dormitory rooms, the CB400A controls provides privacy and ensures that both doors are locked only when the bathroom is occupied and unlocked when the bathroom is not occupied. The CB400B controls provide emergency access by facility staff. Both doors unlock when signalled by the fire life safety system.

#### **For communicating bathroom systems with EMLocks**

<b>CB401-AU</b>	The CB401-AU is located inside the bathroom. Depressing the button locks both doors for privacy. Pressing the button again unlocks both doors ensuring both doors are unlocked when unoccupied.
<b>CB401-B</b>	The CB401-B emergency door release (2 required) is located outside the bathroom above or adjacent to the door. The illuminated push switch lens indicates the doors are locked. Depressing the push switch unlocks both doors.

**Additional system requirements:** Two SDC EMLocks 1581-DPS 650lbs holding force or 1571-DPS 1200lbs holding force; 631RF CR access control power supply with fire alarm release input.

#### **For communicating bathroom systems with Hi/Tower® electrified locksets**

<b>CB402-AU</b>	The CB402-A is located inside the bathroom. Depressing the push switch locks both doors on the outside only. Doors are always unlocked on the inside for uninhibited egress. Exiting either door causes both doors to unlock.
<b>CB402-B</b>	CB402-B emergency door release (2 required) is located outside the bathroom above or adjacent to the door. The illuminated push switch lens indicates the doors are locked. Depressing the push switch unlocks both doors.

**Additional system requirements:** Two SDC HiTower® locksets Z7250-REX or Z7850-DS ; 631RF LR access control power supply with fire alarm release input. Power transfer hinge loop required with Z7850-DS and Z7250-REX.

### Request-to-Exit PIR Sensor

MD31D-W

MD31D-B

The SDC MD31D passive infrared detector is specifically designed for request-to-exit applications. It has an adjustable 1-60 second time delay. The coverage field is internally pointable. When angled 14° down, coverage may be 5 x 6 feet at 7 feet high to 10 x 12 feet at 15 feet high. The MD31D projects a wrap around "U" pattern down and away from the door to inhibit tampering. The MD31D may be mounted to the frame header, wall or ceiling. Complies with NFPA applications.
