

ABLOY® SENTRY

The security solution for extreme application

NEW PATENTED ROTATING DISC MECHANISM

The unique ABLOY® detainer disc cylinder mechanism has been a symbol of high security and superior performance ever since its invention. Long lasting working life for ABLOY® SENTRY is based on patented improved resistance against wear and tear (AWS) -system. Because of the AWS the effect of wear to the cylinder mechanism is minimized. Its new patented functional features give more exact user experience.

The ABLOY® SENTRY cylinder, keys and key blanks are protected by patents world-wide until 2027.

One Key Fits All Industrial Locks

ABLOY® SENTRY locks can be keyed into the same master-key system using one key profile. That means one key can open up all padlocks, camlocks and cabinet locks within the application.

Upgrading Locking Environment

ABLOY® SENTRY can be retrofitted to replace old cylinder systems. It is a cost effective way to upgrade existing locking systems to a patented cylinder system.

Customised Solutions

If our standard product doesn't fit in into your application, it can be customised to fit your requirements.

SUPERIOR MASTER-KEYING

The design and operating principle makes it possible to create master keys to your precise specifications. The unique capabilities make ABLOY® SENTRY ideal for applications where wide master keys and a patented cylinder system is needed.

KEY SECURITY

To guarantee maximum customer security, the **ABLOY® SENTRY** system offers several key profiles and various levels of key control to satisfy individual security requirements. Security is also optimised by the vast number of key combinations available with **ABLOY® SENTRY**. Duplication of keys is always strictly controlled. In order to get additional **ABLOY® SENTRY** keys, you must have a related keycard. These safety measures combined with ABLOY's reliable procedure makes it safe.

FUNCTIONALITY UNDER EXTREME CONDITIONS

No weather condition is too tough for the new **ABLOY® SENTRY** cylinder. Based on rotating discs, the construction is extremely resistant against dirt, freezing, salt water and wear.
