

ABLOY® EL466, EL566
*Europrofile handle controlled
multipoint locks*

New ABLOY® multipoint locks are the latest extension to the wide ABLOY® Europrofile electromechanical lock case range.

FUNCTION

The **ABLOY®** multipoint solenoid locks offer several functional options with comprehensive selection of status indications in one multipoint locking solution. In addition to increased security, they offer the same versatility as **ABLOY®** singlepoint solenoid lock cases do.

ABLOY® multipoint locks contain EL460/EL560 based main solenoid lock in the middle and two auxiliary locks with hook bolts. All three lock cases share the same forend and the locks are controlled by the main lock in the middle. Handle controlled locks can be set to function as fail locked or as fail unlocked. In the fail locked setting, the lock can be opened by handle when power is on, and it can not be opened by handle, when power is off. In the fail unlocked setting, the electrical function is the opposite.

ABLOY® EL566 and **ABLOY®** EL466

Only outside handle is electrically controlled. The lock can always be opened by inside handle and by cylinder.

ABLOY® EL567 and **ABLOY®** EL467

Both inside and outside handles are electrically controlled. Mechanical opening by cylinder or thumbturn is always possible.

APPLICATION

The locks are recommended to be used in the interior doors of business premises, public buildings, hospitals etc. Typical applications are:

- Security doors (medium traffic)
- Fire doors (medium traffic)
- Other higher doors in e.g. storage rooms and technical maintenance rooms

EL566 and EL567 are used in wooden and metal doors. EL466 and EL467 are used in narrow profile doors. EL566 or EL466 with split spindle is chosen, when exit by handle is needed. EL567 or EL467 is chosen, when both access and exit are electrically controlled.

Handle controlled locks are best suited in medium traffic doors. The locks can be electrically controlled by access control system or by a remote control system such as timer, keypad or push button.

For high traffic doors we recommend **ABLOY®** motor locks.

The locks can be used in emergency exit, panic exit and fire rated doors (EN).

The locks are not suitable for use with door automatics.

Also available:

- Microswitch locks
 - EL366 for wooden and metal doors
 - EL266 for narrow profile doors
- Mechanical locks
 - EL166 for wooden and metal doors
 - EL066 for narrow profile doors

Also available lock cases for Swiss cylinder (RZ):

- EL568 (split spindle), EL569 (through spindle) for wooden and metal doors
- EL468 (split spindle), EL469 (through spindle) for narrow profile doors
- EL368 microswitch lock for wooden and metal doors
- EL268 microswitch lock for narrow profile doors
- EL168 mechanical lock for wooden and metal doors
- EL068 mechanical lock for narrow profile doors

STANDARD DELIVERY

Lock case is delivered as fail locked and its opening direction (handing) is 4 (split spindle) or 2.4 (other models).

Standard delivery includes: lock case, fixing screws etc, spindle adapters and installation manual.

Please specify when ordering: lock type, backset, forend length.

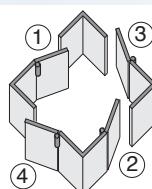

STANDARDS

EN STANDARDS

EN 179:1997 + A1:2001	Exit
EN 1125:1997 + A1:2001	Panic exit

TECHNICAL DETAILS

Operating voltage:	12 – 24 V DC STAB (-10%, +15%)
Current:	Max. 0.4 A (12V DC), 0.17 A (24V DC), less than a second
Micro switches:	Idle 0.13 A (12V DC), 0.065 A (24V DC)
Operating temperature:	Max. 0.5 A 30 V AC/DC resist, 10 W
Bolt throw:	-20°C - +60°C
Backset:	20 mm (deadbolt), 10 mm (double action bolt)
Forend:	55, 60, 65, 80, 100 mm (EL566)
Spindle:	30, 35, 40, 45 mm (EL466)
Door gap:	2 - 5.5 mm
Settable functions:	Mechanical functions: - Handing of trigger bolt - Electrically controlled side (EL566, EL466)
Monitoring outputs:	Electrical function: - Fail locked / Fail unlocked
	Bolt deadlocked
	Bolt inside the lock case
	Trigger bolt in
	Handle used
	Cylinder used
	Cable sabotage

The safety features of this product are essential to its compliance with EN 1125. No modification of any kind, other than those described in the installation manual, are permitted.

EN179 and EN1125 standards are conformed, when the above mentioned lock is installed with ABLOY® striker plates listed in this brochure.

This document may not be used in the installation of a lock. Drilling and wiring diagrams and installation instructions are included in the installation manual, which is included in each lock case package.

We reserve the right to make alterations to the products described in this leaflet.
