

# LOW VOLTAGE CABINET LOCK

Locking kitchen cabinets to keep children safe or securing office drawers with confidential documents has never been as easy or effective as it is with YNOTLOC YC10. The YC10 mounts inside cabinetry so is completely hidden from view yet it is simple to control and operates instantly when requested to give the ultimate balance in convenient locking.

## Plug and Play Connection

- Locks and connecting wires plug together which ensures fool proof connection.
- Daisy chaining operation simplifies the wiring.

## Concealed Security

- All the locks components are hidden inside the cabinetry ensuring a clean look as well as offering a further level of security.

## Small Physical Size

- 76mmL x 30mmW x 30mmD.

## Easy Installation

- Patent installation aid ensures the lock and strike align perfectly.
- A screwdriver is required to fit the locks and strikes and the wiring is a press connection.

## Complete Safety

- A fail secure lock to guarantee cabinets are always left secured when the door or drawer is closed.

## Convenient Control

- Single or multiple locks can be control at one time.
- Multiple unlocking methods can be used to control the locks.

## Purchasing Options

- Pre-made packs offer a one box solution.
- Grow your system by adding more packs.
- Individual components offered separately.

## Approvals

- Cycle tested to 1000000 operations.
- Various worldwide patents granted.

# PRODUCT SPECIFICATIONS

Readymade packs or individual components are available to suit any installation from DIY to commercial. A patented installation aid ensures fitting the lock is a quick and easy process and wiring couldn't be easier with 'plug and play' connections. Robust materials and considered design ensures the locks will meet the demands of most installations.

## YC10 SPECIFICATIONS

**Fail Safe Lock and Strike (YNL502)**

**2 Lock Starter Pack (YNL502A)**

**4 Lock Pack (YNL502B)**

**Magnet wand (YNL503)**

**Jumper wire (YNL504)**

**Sensor (YNL505)**

**Transformer (YNL507)**

**Bolt Pin**

Steel, Ø8mm, 6.5mm stroke

**Holding Force**

615N (63Kg)

**Voltage at Lock**

12VDC +/-10%

**Current Usage**

Locked: nil

Unlocked: 250mA@12V

**Materials**

Plastics: ABS

**Approvals**

Various worldwide patents  
Cycle tested to 1000000 operations
